

MODEL YEAR 2026 WHAT'S NEW

1. New stunning paint designs featuring exciting new paint colors.
2. Larger square-shaped windows with wood framed valances and a leather accent. This hardwood valance with an integrated LED strip light hides the interior metal window trim ring.
3. LED strip light in bed base is activated when bed/mattress is lifted to gain access to your stored items. Great additional lighting.
4. LED strip lighting added under the sofa/dinette cabinets.
5. Added six inches of night shade material to the bottom of the driver's side solar shade to mirror the main solar shade on the windshield. Another customer driven idea to block the sun better while driving.
6. All rear bathroom floorplans will have a single sink as standard equipment with an option for double sinks.
7. Beautiful upgraded tile work in the entry well.
8. GE convection microwave with air fryer replaces Furrion microwave.
9. Upgraded to larger 43-inch Samsung Smart TV in bedroom.
10. Driven by customer feedback, on the exterior entertainment center, we went back to the JBL soundbar that swings out with the TV like we did on the 2023 Aspire's.
11. Optional 74-inch hide-a-bed or theater seating with two end tables ILO 100-inch sofa on the B and Z floorplans.
12. On the R floorplan, we added a new dinette design, added a pantry with pull-out drawers, eliminated the TVs in the bunk area and added another pantry.
13. Added the newest Starlink standard system and made the high performance system optional. Also installed an on/off switch located in overhead cabinet above entrance.
14. A larger kitchen window is framed with beautiful accent tile and solid-surface material thus eliminating the two small spice storage nooks.
